Passage

Causes and Treatment of Diabetes

Causes

Doctors do not know what causes diabetes. If your parents or grandparents have it, you also have a higher chance of getting it. In other words, it is due to genetic (遺傳) problem. Being overweight and not getting enough exercise can also put you at a higher risk. High blood pressure may also cause diabetes.

Symptoms (problems)

People who have diabetes are often very thirsty, and they urinate a lot. Your skin can become dry, and you may get very tired. Diabetes can cause heart disease, kidney problems and may even cause death.

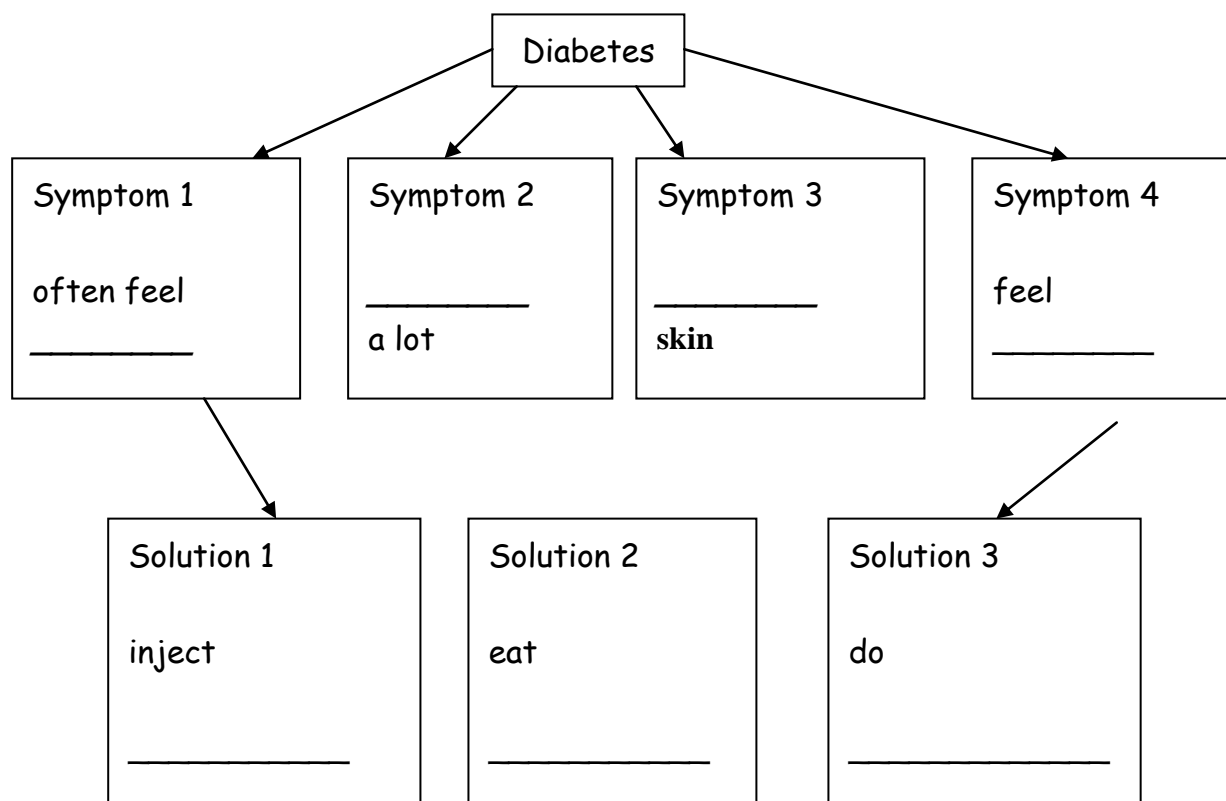

How to treat diabetes?(solutions)

People who have Type 1 diabetes must get insulin every day. Usually they have to inject it into their body. Older people who have Type 2 diabetes should eat healthy food and do a lot of exercise.
